

Take your home comfort system to the next level.

Complement your system with our suite of technologically advanced accessories to more precisely and efficiently maintain the temperature and air quality in your home. Altogether, It's the most advanced accessories package available that delivers next-level perfect air.

Smart Air Quality Monitor

S40 Smart Thermostat

Smart Room Sensor

Wireless Extender

Lennox® S40 Smart Thermostat

Welcome to your home comfort command center.

Unlike most smart thermostats, the Lennox S40 Smart Thermostat is more than a temperature regulator. It's the command center for your entire system, with the incredible ability to monitor sensors throughout your home and in all your equipment. From detecting air pollutants and customizing comfort by room to providing maintenance and service reminders, it will even automatically alert you if your system goes out of tune and allow you to remotely share diagnostics with your local Lennox dealer. The Lennox S40 Smart Thermostat not only provides the most precise and perfect air, it also gives peace of mind.

Lennox Smart Room Sensor

Perfectly balanced temperatures across rooms.

The Lennox Smart Room Sensor helps you dial in a more perfect environment by providing accurate temperature and humidity readings to the S40 Smart Thermostat and telling it how to balance temperatures across the rooms where the sensor is placed.

Lennox Smart Air Quality Monitor

Perfect air, perfectly monitored.

The Lennox Smart Air Quality Monitor detects and tracks particulates, carbon dioxide and volatile organic compounds (TVOC's) inside the home. When poor quality air is detected, it triggers your system to cycle and clean the air, providing peace of mind that your family is breathing the most healthy, perfect air.

Lennox Wireless Extender

Greater range. Greater performance.

The Lennox Wireless Extender improves the connection between the S40 Smart Thermostat, Smart Room Sensor and Smart Air Quality Monitor, in larger homes or areas with reduced coverage or "dead spots."

S40 SMART THERMOSTAT:

Precise Comfort Plus works with Lennox digital variable-capacity equipment to offer the highest level of comfort and overall system performance.

Feels Like™ considers the humidity levels to deliver the temperature you want to feel, rather than the temperature you set.

Schedule IQ combines with Smart Away™ Mode to learn your routine and create an energy-optimizing schedule of operation.

Advanced Diagnostics and Remote Sharing protects your investment and keeps your system at peak performance with advanced diagnostics that can be remotely shared with your local Lennox dealer to troubleshoot issues and avoid unnecessary service visits.

Monitor temperatures and schedules from anywhere in the world using the Lennox® Smart Thermostat app on your smartphone or tablet. Effortlessly integrates with a range of smart home devices—from premium smart home systems like Control4 to popular virtual assistants like Amazon Alexa and Google Assistant.

View overall system performance details and more when you opt in for monthly performance report emails.

SMART ROOM SENSOR:

When a room is in use, occupancy sensors keep your set temperature. When it's not, the sensors revert to a more energy efficient temperature.

Designed to pair with the Lennox S40 Smart Thermostat as part of a fully communicating home comfort system.

When connected to the Lennox S40 Smart Thermostat, homeowners can monitor, control, and balance room temperatures from anywhere using the app.

Discrete, completely wireless, and thanks to its versatility and portability, installs in minutes.

SMART AIR QUALITY MONITOR:

The only monitor available that enables on-demand ventilation, purification and filtration based on real-time air quality readings.

When paired with a ventilation system, real-time weather tracking and seamless communication give you the best possible indoor environment.

Designed to pair with the Lennox S40 Smart Thermostat as part of a fully communicating home comfort system.

Monitors and controls air quality from anywhere using the app.

WIRELESS EXTENDER:

Strengthened connection nearly doubles coverage area.

Enhances reliability, performance, and usability.
